SKILLS

Programming Languages:

- C, C++, Java, PHP, JavaScript, PLSQL, C#, Python, Go

Frameworks & Libraries:

- Laravel, ReactJS, JEE, Spring, .NET, NextJS, FastAPI

Databases:

- MySQL, Oracle(PL/SQL), Redis, Postgres

Development Tools:

- Git, Docker, Postman, Trello, Jira

Project Management:

- Scrum

INTERESTS

- Passionate about integrating gamification into technology projects to improve user engagement.

LANGUES

- Arabic - Native
- French - B2 (Rosetta Stone Test)
- English - C1 (Rosetta Stone Test)

TAHA HAMMADATE

SOFTWARE ENGINEERING STUDENT - FINAL-YEAR

Final-year software engineering student seeking opportunities in software development.

PROFESSIONAL EXPERIENCE

Software Engineering Internship - AI Recommendation Engine

Zaytech Software | April - June 2026

- Designed and developed a real-time cross-sell recommendation engine integrated with the Clover POS system, featuring automatic item classification via LLM and customer-history-based personalization (simulated AOV uplift of +5.66% on real data).
- Stack: Python, FastAPI, PostgreSQL, Redis, Docker

Full-Stack Development Internship — SaaS Delivery Management Platform

Zaytech Software | April - June 2025

- Designed and developed a multi-tenant SaaS platform for restaurant delivery management, including work-schedule management, RBAC, geographic zones, subscriptions, and payments.
- Stack: Laravel/REST API, NextJS, Postman, Stripe, MySQL

PROFESSIONAL PROJECTS

E-commerce Web Application

Academic project | 2026

- Developed a .NET e-commerce site with a high-performance cart (Redis) and an LLM-based intelligent chatbot using RAG for customer support.

Master's Program Registration Management

Bachelor's Final Project | 2024

- Developed a JEE web application (Oracle, PL/SQL) centralizing master's program registration management for Moroccan faculties, including UML design, version control with Git, and Scrum project management.

J-QL - JSON Query Language

Personal project | 2026

- Designed and implemented a custom query language (scanner, parser, AST, evaluator) in C++ to explore and extract data from JSON files.

Keval - Key Value Store

Personal project | 2026

- A Redis-compatible, single-node key-value store in Go, built from scratch (TCP networking, RESP protocol, concurrent storage engine, TTL/eviction, crash-safe persistence)

EDUCATION

2024 - 2027 : Software Engineering Degree, Hassan II University, Morocco

2021 - 2024 : Bachelor's in Computer Science, Moulay Ismail University, Morocco

CERTIFICATIONS

IBM | Introduction to DevOps - Coursera

CCNA | Introduction to Networks - Cisco Networking Academy
